Regarding: SecureAdmin Update

Dear Customer,

L-1 Enterprise Access Solutions, a division of L-1 Identity Solutions is pleased to announce the release of an updated version of the SecureAdmin application used to administer the 4G Fingerprint Reader product suite. In conjunction, L-1 Enterprise Access Solutions is releasing firmware 4.1.5.0.1.0.0 for the 4G Fingerprint readers.

This updated version features the ability to add many new features directly to templates, like expiry and user mode.

Technical Services for the Enterprise Access Division recommend upgrading all compatible hardware to this firmware level and update SecureAdmin to this level.
