**Regarding: 3Di Admin Manager Update**

Dear Customer,

L-1 Enterprise Access Solutions, a division of L-1 Identity Solutions is pleased to announce the release of an updated version of the 3Di application used to administer the 3D FastPass Face Reader. In conjunction, L-1 Enterprise Access Solutions is releasing firmware 5.2 for the 3D FastPass Face Reader.

This updated version features the ability to perform firmware updates within the program, an enhanced identification speed, options around what intermediate data is stored on the device and a significant amount of bug fixes and related minor enhancements.

Technical Services for the Enterprise Access Division recommend upgrading all compatible hardware to this firmware level and updates to the 3Di to this level.
